Algebra can essentially be considered as doing computations similar to those of arithmetic but with non-numerical mathematical objects. However, until the 19th century, algebra consisted essentially of the theory of equations. For example, the fundamental theorem of algebra belongs to the theory of equations and is not, nowadays, considered as belonging to algebra (in fact, every proof must use ...

Linear algebra is the branch of mathematics concerning linear equations such as:  $ax + by = c$ , linear maps such as:  $(x, y) \mapsto ax + by$ , and their representations in vector spaces and through matrices.. Linear algebra is central to almost all areas of mathematics. For instance, linear algebra is fundamental in modern presentations of geometry, including for defining basic objects such as lines, planes ...
