Bicycle Salvage Yards Near Me [Locator Map + Guide + FAQ]

Cyclocross Bikes. Cyclocross bicycles are a special type of road bike designed to be raced on a mixed surface course (combination of pavement, unpaved trails, gravel, grass). They have a drop handlebar like regular road bikes, but the tires are a littler wider for more off-road traction, and they have a different style of brake that helps to prevent mud buildup in the frame.

Cleat Fore/Aft position. Fore/aft cleat position has changed over the years as cycling shoes have become stiffer. While some cyclists find positioning the center of their cleat behind the ball of their foot (the big bump on the foot behind the big toe # 1) is comfortable, others place the center of the pedal spindle even closer to the bump (back from the pinky toe # 5) on the outside of the foot.
