The domestic cat is a member of the Felidae, a family that had a common ancestor about 10–15 million years ago. The genus *Felis* diverged from other Felidae around 6–7 million years ago. Results of phylogenetic research confirm that the wild *Felis* species evolved through sympatric or parapatric speciation, whereas the domestic cat evolved through artificial selection.

When you are ready to introduce your cat to your dog, make the initial meeting a quick one—approximately ten minutes. Keep the dog on a leash and allow the cat to roam around and venture as close to the dog as he or she wishes. Use a head collar (halter) on your dog if there is a chance that you may not be in complete control of the situation.
