Early Childhood Education is a term that refers to educational programs and strategies geared toward children from birth to the age of eight. This time period is widely considered the most vulnerable and crucial stage of a person's life. Early childhood education often focuses on guiding children to learn through play. The term commonly refers to preschool or infant/child care programs.

### ~~An Overview of Early Childhood Education~~

The areas of child's development targeted in the specific curriculum for early pre-school age, as physical development, health, personal care, socio-emotional development, cognitive development, language development and communication, developing skills and attitudes in learning are essential to achieve a customized education, by identifying the child potential and the difficulties/disabilities of each child by the teacher.

### ~~Harlow College - Early Early Childhood Education and Care ...~~

Early childhood, defined as the period from birth to eight years old, is a time of remarkable growth with brain development at its peak. During this stage, children are highly influenced by the environment and the people that surround them. Early childhood care and education (ECE) is more than preparation for primary school. It aims at the holistic development of a child's social, emotional, cognitive and physical needs in order to build a solid and broad foundation for lifelong learning ...

### ~~Early childhood care and education - UNESCO~~

Although many early care and education professionals have extensive experience (approximately 50% have at least 13 years in the field), they generally earn very low wages. The average wage for early care and education professionals is less than \$11 an hour, or just over \$22,000 per year. The highest earners are typically prekindergarten teachers in school-based classrooms and the lowest are professionals caring for infants and toddlers.

### ~~The Early Care and Education Workforce~~

Early Childhood Care and Education Providers Face a Deep Crisis. While we know that ECCE is critical to children's health and well-being, fewer studies have shed light on the 2.2 million providers, many of whom are women of color who care for the 10 million children in early childhood care. These child-care providers are in a double bind.

### ~~Research Shows the Importance and Paradox of Early ...~~

Teaching methods and materials There are different programmes for early childhood education in the Netherlands. Some are used throughout the country, others - such as Taalrijk, Speeltaal and Kinderklanken - only locally. Programmes are usually carried out at day nurseries, playgroups or primary schools (years 1 and 2).

### ~~Teaching and Learning in Early Childhood Education and Care~~

The central principles and overall objectives of early childhood education and care are outlined in the ECEC Act. The Act defines ECEC as a planned and goal-oriented entity of education, upbringing and care, with an emphasis on pedagogy. The strong emphasis on pedagogy is new in the legislation.

### ~~Teaching and Learning in early childhood education and care~~

Early Childhood Education and Care - Home The OECD conducts analysis and develops new data in early childhood education and care (ECEC) to provide valid, timely and comparable international information to help support countries review and redesign policies to improve their early childhood services and systems.

### ~~Early Childhood Education and Care - Home - OECD~~

Early childhood education (ECE; also nursery education) is a branch of education theory that relates to the teaching of children (formally and informally) from birth up to the age of eight. Traditionally, this is up to the equivalent of third grade. ECE emerged as a field of study during the Enlightenment, particularly in European countries with high literacy rates.
