Step 1 Here is what the first object to draw looks like (You can use the grid as a reference to replicate this object) I used 2 Splines. You can choose to draw one Spline, and MIRROR is to find the second half of the image

Awesome and Exciting CAD Projects for Beginners - You Need - 1-1

Step 1. Before we can draw the street and buildings we need to establish our horizon line (eye level) and vanishing point. Step 2. By connecting perspective lines to the vanishing point we can create the illusion of a road bound by a pair of sidewalks. Step 3. Let's create a side street off of the main perspective road.

One Point Perspective Drawing: Step by Step Guide for - 1-1

The Mac version of AutoCAD applies an OS X native interface that differs from its Windows counterparts. Although the core concepts covered in this book are universal, the step-by-step procedures differ between the two operating systems. The procedures covered in this book are intended for use with only the Windows-based version of AutoCAD.
