For example, "/etc/hosts" looks like the following. 127.0.0.1 localhost 127.0.1.1 host_name # The following lines are desirable for IPv6 capable hosts ::1 localhost ip6-localhost ip6-loopback ff02::1 ip6-allnodes ff02::2 ip6-allrouters . Each line starts with a IP address and it is followed by the associated hostname.. The IP address 127.0.1.1 in the second line of this example may not be found ...

Chapter 5. Network setup - Debian

Python has a lot of GUI frameworks, but Tkinter is the only framework that's built into the Python standard library. Tkinter has several strengths. It's cross-platform, so the same code works on Windows, macOS, and Linux. Visual elements are rendered using native operating system elements, so applications built with Tkinter look like they belong on the platform where they're run.

Python GUI Programming With Tkinter - Real Python

The Red Hat AMQ streams component is a massively scalable, distributed, and high-performance data streaming platform based on the Apache Kafka project. It offers a distributed backbone that allows microservices and other applications to share data with high throughput and low latency.
