## **Solved: TWO GROUPS OR ONE? Situations Comparing Two Propor ...**

Stating in  $H_0$  that the two proportions are equal is the same as saying their difference is zero. If you start with the equation  $p_1 = p_2$  and subtract  $p_2$  from each side, you get  $p_1 - p_2 = 0$ . So you can write the null hypothesis either way. The formula for the test statistic comparing two proportions (under certain conditions) is. where
