### Was Darwin Wrong? - Scientific American Blog Network

Although Darwin's theory of natural selection was basically correct, in the late 1860s he proposed a theory that was very wrong. That theory—"pangensis"—was an attempt to explain variation among individuals in a species. Offspring in sexual species display a mix of traits from both of their parents.

### What Darwin Got Right (and Wrong) About Evolution

Darwin was wrong, a group of scientists argued at a conference in southern California. Scientists presented evidence over the weekend refuting Charles Darwin's theory of evolution on many levels - including fossil record, natural selection and the origin of man - and his works in geology and other science areas.

### Darwin Was Wrong, Scientists Argue - The Christian Post

Darwin took a swing at the problem of inheritance and missed, sure, but let's keep in mind that he was also responsible for what is arguably the greatest theory ever: evolution by natural selection.

Darwin was wrong: it wasn't admiration of ourselves but a humble recognition of being created in God's image. Remove that and there really isn't much else to admire but yourself, and Darwin certainly admired his theory! Wallace saw things differently. He found in evolutionary theory an implicit teleology. His was an intelligent evolution.
