Life-Span Human Development 9th Edition - amazon.com

Development of the human body is the process of growth to maturity. The process begins with fertilization, where an egg released from the ovary of a female is penetrated by a sperm cell from a male. The resulting zygote develops through mitosis and cell differentiation, and the resulting embryo then implants in the uterus, where the embryo continues development through a fetal stage until birth.

Development of the human body - Wikipedia

Leadership in Organizations, 9th Edition provides a balance of theory and practice as it covers the major theories and research on leadership and managerial effectiveness in formal organizations. Rather than detailing an endless series of studies or prescribing exactly how leaders must operate, it sticks to the major findings and offers ...

Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Discussion Children and adolescents change and grow in many ways: physically, socially, emotionally and intellectually. It is a fact of life. Change and growth -- development-- can be stressful, so it is important that teachers are aware of the changes so they can design instruction and instructional environments that facilitate learning, despite the stress of change.
