On This Day in Space: Sept. 14, 1966: Gemini 11 sets all-time altitude record. By Hanneke Weitering On Sept. 14, 1966, NASA's Gemini 11 mission set an all-time spaceflight altitude record.

## Space.com: NASA, Space Exploration and Astronomy News

Space is the boundless three-dimensional extent in which objects and events have relative position and direction. Physical space is often conceived in three linear dimensions, although modern physicists usually consider it, with time, to be part of a boundless four-dimensional continuum known as spacetime. The concept of space is considered to be of fundamental importance to an understanding of ...

Outer space, or simply space, is the expanse that exists beyond Earth and between celestial bodies. Outer space is not completely empty—it is a hard vacuum containing a low density of particles, predominantly a plasma of hydrogen and helium, as well as electromagnetic radiation, magnetic fields, neutrinos, dust, and cosmic rays. The baseline temperature of outer space, as set by the background ...
