Analysis

Systems analysis is "the process of studying a procedure or business to identify its goal and purposes and create systems and procedures that will efficiently achieve them". Another view sees system analysis as a problem-solving technique that breaks down a system into its component pieces, and how well those parts work and interact to accomplish their

Weibull's Derivation n
 $n - = - P P 1 (1) x x$

Let's define a cdf for
each link meaning the
link will fail at a load X
less than or equal to x
as $P(X \leq x) = F(x)$ Call P_n
the probability that a
chain will fail under a
load of x If the chain
does not fail, it's
because all n links did
not fail If the n link
strengths are
probabilistically
